The Company

Tsunami Axis is one of the UK's largest suppliers of furniture to the commercial interiors sector. As well as being Herman Miller's largest dealer partner outside of the US, Tsunami works with a wide range of high-profile European manufacturers. Launched in 1999, Tsunami Axis has completed some of the largest furniture projects nationally and internationally. We provide unrivalled support at every level of a project and have offices in London, Glasgow, Edinburgh, Frankfurt, and West Africa.

The Tsunami Axis team has many years of combined experience within the commercial interiors sector, working with some of the most well-known clients in the Technology, Media, Legal and Finance industries. The expertise and skills of the 60-strong team encompass all aspects of design, supply, project management, installation and after sales management.

Job Role

As a designer, you will be working to deliver a number of International projects running simultaneously under the guidance of a lead designer. To deliver these projects, you will be engaging with key stakeholders across various departments throughout all stages of a project.

Day to day tasks include space planning, creating product specification packs, visualising products and settings, product take-offs, as well as creating supporting presentational documents. This role will allow you to learn and develop your product knowledge and skills, working on a client account that provides varied opportunities and unique challenges. You will be exposed to range of UK and European suppliers TA work alongside
